Topic

We live in a time where moderate religion is fading and yet answers to life's big questions remain. Archetypal astrology can address core issues about human nature. It blends philosophy, spirituality, and psychology into a penetrating worldview. This evening we will get an introduction to this way of thinking. Drawing on traditional concepts from astrology and Jungian psychology we will adapt both to modern times.

We will ask and answer questions about the dawning of the current Age of Aquarius, about what to expect in times like these and how your chart might help or hinder you to understand the times we live in.
